## KRISHAK SATHEE

**KRISHAK SATHEE** is an unique organic manure having pesticidal action. It is a well composed, highly enriched, perfectly balanced and finest grade organic manure suitable for all kinds of timber crops, vegetable crops and field crops. It is a state of the art manure having the potential to enhance the yield, safeguard the soil health and protect the crop against harmful pests. It supplies most of the essential major and micro nutrients required optimum level of management.

### Advantage

- Supplies almost all the major, secondary and micronutrients required for plant.
- Creates optimal conditions in the soil for high yields and good quality crops.
- Improves growth and physiological activities of plants.
- Enhances flowering, fruit set and reduces fruit drop.
- Improves keeping quality and self-life of vegetable crops.
- Induces resistance in plants against disease and insects and hence reduces the cost of plant protection measures.
- Improves soil physical properties such as granulation, tilth, aeration, root penetration and water holding capacity.
- Improves chemical properties such as supply and retention of soil nutrients and promotes favourable chemical reaction.

## HARITPRASS

**HARITPRASS** is a multipurpose tonic for all crops and vegetables. It prevents the vegetative growth of the crop and increase the fruiting of crops. Haritprass increase the production of crops. 2-3 sprays gives good results between 30 - 60 days.

### Advantage

- It is purely Organic
- It improves yield and self-life of output.
- It helps in reducing of fruits & flower dropping.
- It promotes photosynthesis and increases protein synthesis, root growth and development.
- stimulates growth, increase vitality and vigour.

**Doses** : 2.5 ml - 3ml per liter  
approx. 500 - 600ml per acre.

### Composition :

- Hydrolysed Marine Protein – 5% • Ascophyllum SPP – 2%
- Chelated B Vitamins. -2.50% • Aqa Media – 90.5%

## TEZAS

**TEZAS** is a copper based product containing soluble copper for foliar application used to control large variety of fungal diseases in plant such as leaf curl, powdery mildew, blackspot, supply copper nutrient to the plant. It is very much beneficial in chilly, tomato, garlic crops etc.

### Advantage

- It has both preventive & curative activities.
- It mainly prevents damaging of plants due to fungal infection
- It also prevents damaging of plants due to bacterial & viral infections.
- It is an effective alternative to synthetic fungicides.
- It also acts like a plant tonic, which rejuvenates the affected plants instantly to a healthy and productivity state.

**Doses** :  
500 ml. to 1 liter per acre in 100 - 200 liters  
of water depending upon the requirements of crop.

### Composition

- Coper Aminoacid - 10 %
- Aqua Base - 90 %

## BAZZRA

**BAZZRA** is a wetting and spreading agent. It is used with all types of pesticides, Fungicides and weedicides. Bazzra increases the distribution and absorption of the spray in the plants. Bazzra is recommended in all types of crops and vegetables.

### Advantage

- Compatible with all commonly used insecticides, acaricides and fungicides.
- Enhances performance of fungicide and insecticides.
- with low vapour pressure, it reduces the evaporation losses.
- It holds the spray fluid for a longer period of time on leaves and plant surface.

### Doses :

1 ml. of Bazzra in each liter of water or 10 - 12 ml Bazzra is used for each 16 litres spray pump and stir the solution.

### Composition

- Alovera extract - 12%
- non-toxic surfactant - q.s

## APOVITAA

**APOVITAA** is an organic product and a unique combination of the purest form of humic acid and amino acid. Apovitaa provides naturally occurring all major nutrients, enzymes, hormones and important plant growth promoters. Apovitaa contains all essential components for new cell formation in plants. Hence this combination provides plants all essential components and keeps plants healthy and able to increase resistance against various diseases and pests.

### Advantage

- It helps in better germination.
- Improves white root development & shoot growth.
- Increased absorption of major & micro elements to plant.
- Increases natural synthesis of various plant hormones within plant.

### Doses :

100-200 ml per acre in 100-200 ltr of water depending upon the requirement of crop. 1 Ltr of Apovitaa can be used with 500-1000 kg of organic manure by showering, the energy of organic manure increases by 2-3 times.

### Composition :

- Energiser (Humic Acid) - 10 %
- Ascophyllum nodosum - 1.0 %
- Aquous Solvent - 89 %

## APO-T

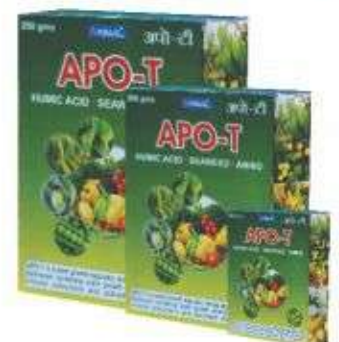

**APO-T** is a plant growth regulator, biologically derived protein hydrolysate containing plant growth promoting substances, enzyme precursors and activated micro nutrients.

### Doses :

Apo-T must be applied directly on the foliage using a dilution at the rate of 1-2 gm. in 1 Ltr. of water.

### Composition

- Humic acid - 80 %
- Amino acid - 10 %
- Sea Weed Extract - 10 %

## SULFOVITA

**SULFOVITA** is a plant food containing liquid sulphur from natural source based on neem for foliar application. It increases the absorption & metabolism of N, P, K, Fe, Mg, Zn & other Micro nutrients. It is beneficial for Onion, Garlic & All fruits & Vegetable.

**Doses :**  
400 to 500ml per acre in,  
100 -200 litres of water.

**Composition :**

- Elemental Sulphur – 20 %
- Aqueous Solvent – 80 %

## SILIOX

**SILIOX** makes availability of silicon to the plants which are already present in the soil to the extent of 60-70% but this is not absorbed by normal and weak roots. siliox sprayed on plants or drenching near roots, activates the roots in such a way that the roots absorb silica from soil. It also effectively safe guard crop from various fungus & bacterial diseases, various stress like high temperatures, humidity, rainfall & changing climatic conditions.

**Time of Application :**

1. 1<sup>st</sup> spray : 15 – 20 days after transplantation / Germination.
2. 2<sup>nd</sup> Spray : At Flowering or Fruit setting stage.
3. 3<sup>rd</sup> Spray : 15 days after 2<sup>nd</sup> spray .

**Dose :** Powder : 2 Gram per Liter of water  
1 Kg per acre for soil application through drip irrigation

**Composition**

- Silica Content – 90 %
- Silica ore – 0.5 %
- Filler & Carriers – 0.5 %

## NEMOCIN

**NEMOCIN** contains. Neem oil in different ppm. it helps in maintaining environmental health by reducing the level of pollution. Nemocin is effective for the management of wide range of insect, pests, like diamond back moth, hoper, aphids, red spider, thrips white fly etc.

**Benefits :**

- It is totally eco friendly & herbal pesticide.
- It is effective for control of insects & pests.
- It stops growth and reproduction of insects, make them weak and finally kill them

**Doses :**

Powder : 1- 2 ml. per Liter of water  
& repeat the spray at an interval of 15 days for better crop growth.
